

The 24th Cyber Defense Initiative Conference 2025

"Quantum Supremacy and The Road to AGI: Revolutionizing Cybersecurity for a Resilient and Trusted Digital Future"

26th – 27th November 2025 | Grand Hall BITEC, Bangkok, Thailand

The Cyber Defense Initiative Conference (CDIC) is Thailand and Southeast Asia's premier cybersecurity and information security event, proudly supported by leading private and public sector organizations. For 24 consecutive years, CDIC has been at the forefront of showcasing next-generation Quantum Computing, Generative AI, Agentic AI and cybersecurity technologies, fostering resilient business communities, and shaping the future of digital trust.

In 2025, CDIC continues this legacy with the theme, **"Quantum Supremacy and The Road to AGI: Revolutionizing Cybersecurity for a Resilient and Trusted Digital Future."** This year's focus explores the transformative power of **Quantum Computing and Artificial General Intelligence (AGI)**, redefining how enterprises and governments worldwide secure their digital infrastructure against emerging threats in a hyperconnected world.

Quantum Computing is rapidly approaching **Quantum Supremacy**, enabling unparalleled computational capabilities that could render traditional cryptographic systems obsolete. Meanwhile we are reaching AGI in year 2030, **AGI will be evolving into a powerful force** capable of enhancing cybersecurity defenses, detecting cyber threats in real-time, and automating complex security operations, conversely, becoming an advanced cyber adversary capable of exploiting vulnerabilities beyond conventional defense mechanisms.

CDIC 2025 will bring together global thought leaders, industry pioneers, and security experts to navigate the unprecedented challenges posed by Quantum Supremacy and The Road to AGI. Through **exclusive keynotes, live demonstrations, and strategic discussions**, the event will delve into critical topics such as **Post-Quantum Cryptography, AI-Powered Threat Intelligence, Digital Trust in the Age of Generative AI, and Cyber Warfare in the Quantum and AGI Era.**
